IDENTIFIERS	*North Carolina Community College System

ABSTRACT

This document contains statistical information about the North Carolina Community College System for the academic year 1995-1996. It presents a summary of the 1995-1996 information collected from each of the 58 community colleges in North Carolina, as well as historical information for an 11-year period. This report is organized in sections that provide information about student enrollment, full-time equivalents, and college staff and faculty. The variables are analyzed in terms of gender, race and ethnicity, age, and geographic origin. The report also examines the above variables in various programs supported by the System: curriculum programs, college transfer programs, general education programs, technical programs, vocational programs, extension programs, basic skills programs, community service programs, the Focused Industry Training program, Human Resource Development programs, the Job Training Partnership Act, Learning Laboratory programs, industry programs, non-occupational programs, and occupational programs. Data are analyzed at the institutional level for each community college in North Carolina as well as at the system level. Results are presented in tabular form, with 50 tables providing all information. The document provides a glossary of terms and a listing of all of the community colleges in North Carolina in the introduction. In addition, the document has three appendices, which contain supplemental data charts. (TGO)

PREFACE

The North Carolina Community College System Office presents the 31st volume of its Annual Statistical Report. This report contains statistical information about the North Carolina Community College System for the Academic year 1995-96. It represents a summary of the 1995-96 information collected from each of the fifty-eight colleges, and historical information from past years. Often, the System Office has information available of a more detailed nature, if the need arises.

This report is organized into logical units that represent information about students, FTE and staff. In addition, a set of appendices show much of the data in chart form. Trend charts show data for the past 11-year period. For student data, unduplicated headcounts are reported at all break levels. When combining numbers, remember that unduplicated subtotals may not add up to unduplicated totals. Reference should be made to the definitions section for clarifying how data should be interpreted.

The preparation of this report requires the work of many people in the community college system. From initial data collection, to reporting data to the system office, to processing the data into the summary form presented here, takes the work of many individuals, and I extend my thanks to each of you for your efforts. Special thanks to the entire Statistical Services group for their efforts in preparing this year's report.

Steve Ijames, Director
Information Services

INTRODUCTION

The Annual Statistical Report contains FTE, student enrollment and college staff/faculty data for the 58 colleges in the North Carolina Community College System for the 1995-96 school year, summer quarter 1995 through spring quarter 1996. Historical student enrollment and FTE are also given.

This publication contains some changes from prior years due to changes in the extension program areas. Data previously reported in the areas of academic, avocational and practical skills extension are now grouped into one category called Community Service. Data previously reported as Adult Basic Education, GED, Adult High School and Compensatory Education are now grouped together into one category called Basic Skills.

Sources of Data: Curriculum and extension registration data, DCC 7-1 and DCC 7-2, provide student enrollment figures and program identification. Each student is counted only once. (See definition of unduplicated headcount below.) Institution's Class Report data, DCC 7-3C and DCC 7-3E, provides the enrollment figures of FTE by major instructional area. College Staff/Faculty Information is summarized using DCC 7-8, and represents data as of October 1, 1996, (Fiscal Year 1995-96).

Calculation of Full-Time Equivalents (FTE): Since many of the students in the Community College System attend class on a part-time basis, it is desirable to equate them to "typical" full-time students. The full-time equivalents (FTE), representative of the amount of time the "typical" full-time student would attend class, was the means developed to standardize reporting. Several part-time students constitute only one FTE.

One full-time equivalent (FTE) is a student in membership for 16 hours of class, shop, or laboratory per week for 44 weeks, the full four-quarter school year. To determine the average annual FTE, the total membership hours reported for the year is divided by 704. Student membership hours for a quarter divided by 176 produce full-time equivalents for a given quarter.

Average Annual FTE: This is the average FTE of the four quarters of summer, fall, winter and spring for a given year.

Budget FTE: For curriculum programs, this is the three quarter (Fall, Winter, Spring) average FTE. For extension programs, this is the four-quarter series (Spring, Summer, Fall, Winter) average FTE.

Unduplicated Headcount: The unduplicated headcount is the number of individuals enrolled in each curriculum or extension program. A student is counted in only one curriculum: therefore, the sum of the enrollment in each curriculum equal the total curriculum enrollment. However, in extension a student is counted in each extension

program in which he or she is enrolled, but he or she is counted only once in each extension subtotal and extension total count regardless of the number of different programs in which he or she is enrolled. Because of this method of counting the extension enrollment, the sum of the enrollments in each program exceeds the total unduplicated extension count.

TERMS AND DEFINITIONS

The definitions shown on the following pages describe the terms used in this publication. Reference should be made to the Education Guide Chart for the North Carolina Community College System for more detailed information regarding curriculum programs offered by the System.

Curriculum Programs include College Transfer, General Education, Technical and Vocational programs.

College Transfer Programs consist of planned academic curriculum programs leading to an Associate in Arts (A.A.), Associate in Fine Arts (A.F.A.), or an Associate in Science (A.S.) degree and designed to allow for transfer to a senior college.

General Education Programs consist of basic course work in English, literature, fine arts, philosophy, social science, science and mathematics, leading to an Associate in General Education Degree (A.G.E.) Or a Certificate in General Education. They are designed principally for students who desire two years of general education beyond the high school level.

Technical Programs are designed to prepare individuals for employment. The completion of the curriculum leads to an Associate in Applied Science (A.A.S.) degree. These programs involve the application of scientific principles in research, design, development, production, distribution, or service.

Vocational Programs consist of a series of courses which are designed to prepare an individual for employment in a specific occupation. These programs consist of a sequence of courses which generally can be completed in one year or less by a full-time student. Successful completion of a vocational curriculum program leads to a diploma.

Extension Programs are comprised of non-credit courses related to occupationally specific areas such as fire service, law enforcement and emergency medical training, community service, business and industry and adult basic skills education.

Basic Skills Programs include Adult Basic Education (ABE), a program of basic educational skills for adults aged 16 or older who are out of school, who have not graduated from high school and who function at less than the ninth grade level of competency; General Educational Development (GED), a program of instruction designed to prepare adult students to pass the GED test that leads to a high school diploma equivalency; Adult High School Diploma (AHS), a program of instruction offered cooperatively with local public school systems to help adult students earn an Adult High School Diploma; Compensatory Education (CED), a program of instruction providing basic education skills for mentally disabled adults; and English as a Second Language (ESL), a program of instruction to help adults who have limited or no proficiency in the English language.

Community Service Programs consist of those extension programs that are directed to the academic, avocational, and development of personal skills of the community.

Focused Industry Training (FIT) program is a grant-funded training service. The primary purpose of the program is to provide additional resources to the colleges to allow them to offer occupational classes in critical industrial skills. Classes supported with these funds do not generate budget FTE.

Human Resources Development Programs (HRD) are intensive and unified efforts to recruit, train, and place in employment or, optionally, vocationally train chronically unemployed or underemployed adults. The primary objective of the training component is to help the jobless trainee reorient himself or herself to the world of work, appreciate the effects of his or her behavior on others, and develop the basic academic and communication skills prerequisite to obtaining and maintaining employment.

Job Training Partnership Training Act (JPTA) programs consist of occupational training and basic education for unemployed, underemployed and disadvantaged persons.

Learning Laboratory Programs consist of self-instruction using programmed texts, audio visual equipment, and other self-instructional materials. A learning laboratory coordinator has the function of bringing the instructional media and the student together on the basis of objective and subjective evaluation and of counseling, supervising, and encouraging persons working in the lab.

New and Expanding Industry Programs provide for the training needs of new industries which are moving into the state and also for existing industries undergoing a major expansion which result in the need for additional skilled manpower.

Non-Occupational Self-Supporting Programs consist of courses which the college may provide at the request of the community but for which the college receives no budgetary credit. Athletics, games and hobby courses fall into this category. The cost of such activities is borne exclusively by the participants or some contracting agency.

Occupational Regular Budget Programs consist of single courses, complete in itself, designed for the specific purposes of training an individual for employment, upgrading skills of persons presently employed, and retraining others for new employment in occupational fields.

Occupational Self-Supporting Programs are occupationally related courses which the college may provide at the request of the community but for which the college receives no budgetary credit. The cost of such activities is borne exclusively by the participants or some contracting agency.

Regular Budget Programs include all programs in the Curriculum (College Transfer, General Education, Technical and Vocational) and Regular Budget Extension Areas (Basic Skills and Occupational Regular Budget).

Staff/Faculty includes Clerical, Faculty, Professional, Senior Administrators, Other Administrators, Skilled Crafts, Technical/Paraprofessionals, and Service/Maintenance personnel employed at the college.

Clerical includes staff whose assignments typically are associated with duties which are clerical/secretarial in nature. Staff in this category are responsible for internal and external communications, recording and retrieval of information (not to include computer operator/programmer), and other office work, such as bookkeepers, typists, data entry operators, bookstore clerk, library clerk (not recognized as a librarian), secretaries, etc.

Faculty includes staff whose primary responsibilities are instructional and involve guiding/directing the learning experiences of pupils in an instructional environment.

Senior Administrators includes staff who are responsible for the overall executive and/or administrative direction of the college as a whole or of a major component of the college. This category includes the chief executive officer (President), and staff who normally report directly to the president and might have functional titles such as dean, vice president, executive vice-president, or other titles.

Service/Maintenance includes staff whose assignments require limited degrees of previously acquired skills and knowledge and in which staff perform duties which result in or contribute to the comfort, convenience and hygiene of personnel and the student body or which contribute to the upkeep and care of buildings, facilities or grounds of college property. Some functional areas are cafeteria worker, truck driver, gardener, construction laborer, security personnel, maintenance worker, etc.

Skilled Crafts include staff whose assignments typically require special manual skills and a thorough and comprehensive knowledge of the processes involved in the work, acquired through on-the-job training and experience or through apprenticeship or other formal training programs. Staff in this category would have titles such as mechanic, repairer, electrician, skilled maintenance, machinist, carpenter, printer, etc.

Other Administrators includes staff whose major responsibility is administrative and whose major activities impact instructional or non-instructional programs. Staff in this category normally report to a senior administrator and some descriptive titles might include director, assistant/associate dean, associate vice-president, or other titles.

Professional includes staff who are assigned to manage non-teaching functions. Educational minimum requirements would normally be a baccalaureate degree or its equivalent. Staff in this category would normally report to an administrator of an instructional or non-instructional program and some functional titles might include coordinator of ABE, computer systems analyst, recruitment coordinator, or other titles.

Technical/Paraprofessional includes staff whose assignments require specialized knowledge or skills which may be acquired through experience or minimal academic work at an associate degree level. Staff in this category normally report to an administrative-level or professional-level person.
